

Better understanding of CML

Providing articles, real patient story videos, and mindfulness exercises, CML Life aims to improve patients' understanding of CML, and facilitate treatment engagement and adherence.

The website

Content on the website is tailored to the user. Both patients and carers are able to keep track of their physical and emotional wellbeing, keep a record of their upcoming appointments, listen to mindfulness podcasts, and learn about CML and its treatment.

The app

Now available for download in the Apple App Store and Google Play Store, the CML Life app has been created for both patients and their carers. It contains the same functionalities as the website but provides support in the moment it is needed.
